

WHY TO PARTICIPATE IN THE CONFERENCE?

COMPANIES (forestry, wood processing, energy)	<ul style="list-style-type: none"> • Interesting and actual themes about processing of forest and wood waste, about energy and necessity of usage renewable energy in the future development politics of the processing firms; • insight into the latest technology for processing biomass and sources of funding projects and obtaining information on the use of aid; • exploring the attitudes of institutions and public administration, potential partners, investors and financiers; • discount for the participation of several participants from one company
SUPPLIERS (technologies for processing biomass)	<ul style="list-style-type: none"> • opportunity for a quality presentation of technologies to the participants who are decision-makers: local government representatives, representatives of forestry, engineers with experience, public opinion makers, government officials, journalists; • familiarizing with the current investment climate, legal framework and the general situation in the wood biomass market in SEE countries
MEMBERS OF PROFESSIONAL CHAMBERS (forestry, wood technology, architecture, energy)	<ul style="list-style-type: none"> • the only regional professional meeting on forest and wood biomass exploitation for energy production; • exploring the latest trends in energy production from renewable sources, the preparatory process, gathering documents, engineering, financing and implementing projects and processing of wood biomass in Europe and the world; • scoring participation
LOCAL GOVERNMENT AND STATE INSTITUTIONS	<ul style="list-style-type: none"> • insight into the current market situation of RES, cogeneration and district heating projects, exploring the possibilities of launching similar projects; • information about funding opportunities and financing projects to produce energy from biomass, foreign experience and getting to know the model of public-private partnerships; • direct contacts with investors, architects and financial institutions
BANK SECTOR, INTERNATIONAL INVESTORS, LAWYERS AND FINANCERS	<ul style="list-style-type: none"> • insight into a projects in preparation; • exploring the attitudes of planners and local investors; • interaction with target group.
ENERGY AND DEVELOPMENT AGENCIES	<ul style="list-style-type: none"> • presentation of the successful energy projects and recommendations for the future projects in local communities; • establishing contacts with potential investors in the processing of wood biomass; • agreements about participation and consultation in new energy projects and the establishment of regional cooperation
ACADEMIC COMMUNITY (professors, students, high school children)	<ul style="list-style-type: none"> • analysis of the current market situation and the presentation of academic projects; • active role in suggesting and selecting of innovative and clean technologies for biomass processing; • establishing contacts with industry and institutions
MEDIA (general and professional)	<ul style="list-style-type: none"> • detailed insight into market opportunities and potential of this sector in the region; • participation in discussions about social responsibility, use of local energy resources and commitment to regional energy strategy;
